RE: In Support of Outreach and Education for Fishing Clinics and Youth Engagement

Greetings Captain Greg and members of Learn 2 Fish With Us team,

We would like to offer our heartfelt gratitude and support for the work you and your team have accomplished through efforts made by Learn To Fish With Us. The Green Bay Fish and Wildlife Conservation Office (GBFWCO) strongly adheres to the United States Fish and Wildlife Service (USFWS) overall mission to *Work with others to conserve, protect and enhance fish, wildlife and plants and their habitats for the continuing benefit of the American people*. To achieve this mission, the USFWS implements several core goals that include, but are not limited to, enhancing recreational fishing opportunities and public use of resources as well as educating and engaging the public to advance our conservation mission.

Successfully reaching large groups of people and effectively communicating messages about fish, fisheries education, and aquatic ecosystems is a task that the GBFWCO cannot do alone. At this time, we would like to recognize the contributions that Learn 2 Fish with Us makes to increasing youth fishing education and opportunities. Learn 2 Fish With Us has found the right combination of program content, delivery, and an enthusiastic group of volunteers to be successful – reaching over 20,000 individuals through 150 fisheries clinics. You are an invaluable resource to our region and we are proud to partner with you on this great work.

We greatly appreciate all the contributions Learn 2 Fish With Us has made and continues to make to fisheries education, and we look forward to continued partnership in the future.

Congratulations and thank you for your efforts,

Susan Wells  
GBFWCO Project Leader
